The **PT1280P/PT1280SL** are heavy duty, indoor/outdoor pan/tilts capable of handling loads up to 100 pounds (45.4 kg). They feature rugged high torque AC motors with adjustable worm-gear final drives to ensure long operational life, as well as drift-free operation.

The **PT1280P** Series is capable of auto/random scan operation when used with a Pelco solid-state auto/random scan control. No additional conductors, micro switches, or relays are required for auto scan operation.

These pan/tilts are factory prewired for feedthrough of all control functions: pan/tilt, motorized zoom lens, 24 VAC camera power, enclosure accessories, and video. Connections are made at the input connector, eliminating the need for wiring harnesses in the field. This feature greatly reduces installation time, while increasing the reliability and serviceability of the system.

The **PT1280SL** includes a slip ring option that allows 360-degree pan rotation.

These units can be mounted on Pelco's universal wall/pedestal mounts: the PM2000/PM2010 for pedestal mounting and the WM2000 with PA2010 adapter plate and ST1 support strut or WM3026 for wall mounting. The EH5700 Series large environmental enclosure is also compatible for use with this pan/tilt series.
